## WHAT IS IAVCEI

---

IAVCEI stands for the **International Association of Volcanology and Chemistry of the Earth's Interior**. The Association represents the primary international focus for: (1) research in volcanology, (2) efforts to mitigate volcanic disasters, and (3) research into closely related disciplines, such as igneous geochemistry and petrology, geochronology, volcanogenic mineral deposits, and the physics of the generation and ascent of magmas in the upper mantle and crust.

At the First General Assembly of IUGG (Rome, 2-10 May 1922), the *Section de Vulcanologie* became one of the constituent sections of the Union. This name was changed into *Association Internationale de Vulcanologie* at the Fourth IUGG General Assembly (Stockholm 1930). The present name of IAVCEI was adopted at the Moscow General Assembly in 1971.

IAVCEI is run by an Executive Committee whose membership changes every four years. The Executive determines policies for the Association, enacting them through a series of Commissions and TaskGroups. IAVCEI aims to be outward-looking, seeks relationships with other international scientific organisations, and participates in international scientific projects. It aims also to maintain a robust publishing policy, encouraging the presentation of high caliber, volcanological research results, mainly through its premier international journal the *Bulletin of Volcanology*.

## CONGRESS CONFIRMED SESSIONS

---

- Production of magma and assembly of volcanic plumbing systems
- Pre and syn-eruptive monitoring
- Volcanic processes
- Minerals for the energy transition
- Geothermal systems and carbon storage
- Hazard, Risk and Impact
- Communication in Volcanology
- The future of volcanology, a bundle of sessions organized by the ECRs (Early Career Researcher) of IAVCEI
